# Neutra Majesté Bathroom Collection

Neutra

With Majesté, Monica Armani debuts her first collection for [Neutra](#), transforming the bathroom into a true design ritual. The bathtub, washbasin and mirror emerge as sculptural figures—domestic architectures carved from stone— that celebrate the purity of gesture, the silence of form, and the strength of material. Their lines are inspired by the regal collars depicted in historical portraits—rising higher at the back and opening toward the gaze—transforming functional furnishings into striking, character-filled presences.

Sculpted from Verde Borgogna quartzite, the collection lends marble a warm and sophisticated voice. One of its most distinctive features is its tailor-made nature — each piece can be crafted on request from a carefully curated selection of natural stones. This bespoke approach perfectly embodies [Neutra's](#) philosophy, where every project becomes an intimate dialogue between space, material and vision.

Majesté transforms the bathroom into a realm of refined exclusivity, where the majesty of nature is sculpted into stone with fluid, organic forms to create a timeless aesthetic and sensory experience. Crafted using cutting-edge technology and meticulously hand finished, the collection features a soft, almost velvety surface that surprises the touch.

A lowered shelf, integrated into the bathtub, breaks with convention by introducing a subtle yet functional gesture. The washbasin, carved from a single block, and the double-sided mirror—set on a stone base with a rotating structure—complete a coherent, sophisticated narrative in which each element reinforces the identity of a bathroom conceived as a poetic, immersive and contemplative space. Majesté is a collection to be experienced with both the eyes and the body, where technology meets the soul of stone to shape a design that stirs emotion

The collection includes a freestanding bathtub with ergonomic seat, a freestanding washbasin, and round and oval mirrors.
